LeetCode | GitHub | LinkedIn | Portfolio | Codolio

SUMMARY

Final-year Computer Science Engineering student with hands-on experience in Python, Java, JavaScript, Machine Learning, NLP, REST APIs, and Full-Stack Web Development. Built AI-powered applications using Flask, React, Scikit-learn, Pandas, NumPy, and MySQL. Passionate about software engineering, problem solving, and scalable application development.

EDUCATION

Parul University

Bachelor of Engineering in Computer Science
Vadodara, Gujarat

2023 – Present

CGPA: 7.95

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++, HTML, CSS
- **Frontend Development:** React, HTML, CSS, JavaScript, Responsive UI
- **Backend Development:** Flask, REST APIs
- **Machine Learning:** NLP, TF-IDF, Cosine Similarity, Scikit-learn
- **Libraries and Tools:** Pandas, NumPy, Matplotlib, Seaborn, Git, GitHub, VS Code, Vercel
- **Databases:** MySQL, MongoDB
- **Core Concepts:** Data Structures, Algorithms, OOP, Problem Solving, Artificial Intelligence, Software Development

PROJECTS

• AI Resume Screening System

GitHub | Live

Python, Flask, React, NLP, TF-IDF, Cosine Similarity

- Built an AI-powered resume screening system to analyze resume and job description compatibility using Natural Language Processing techniques
- Implemented TF-IDF vectorization and cosine similarity algorithms for automated resume matching and skill gap analysis
- Developed a full-stack web application using Flask and React with responsive UI and interactive dashboards
- Deployed the application using GitHub and Vercel for real-world accessibility and testing

• UPI Fraud Detection System

GitHub | Live

Python, Machine Learning, Scikit-learn, Pandas

- Developed a machine learning model to detect fraudulent UPI transactions with 80% accuracy
- Performed data preprocessing, feature engineering, model training, and evaluation using Pandas and Scikit-learn
- Applied classification algorithms and analytical techniques to improve fraud detection performance
- Deployed the application using Streamlit for real-time accessibility and testing

• Algorithm Visualizer Web Application

GitHub | Live

HTML, CSS, JavaScript

- Designed and developed an interactive web application to visualize sorting and searching algorithms
- Implemented real-time algorithm animations and responsive frontend UI using JavaScript
- Improved understanding of Data Structures and Algorithms through visualization techniques
- Enhanced user interaction through dynamic controls and step-by-step algorithm execution

CERTIFICATIONS

- Artificial Intelligence – Infosys Springboard
- Deep Learning – Infosys Springboard
- Natural Language Processing – Infosys Springboard
- Dynamic Programming Camp – AlgoUniversity
- SQL and Relational Databases – IBM SkillsBuild

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems on LeetCode
- Participated in Vadodara Hackathon
- Completed AI, Deep Learning, and NLP coursework with hands-on mini projects
